

# Article Scoring on Medium

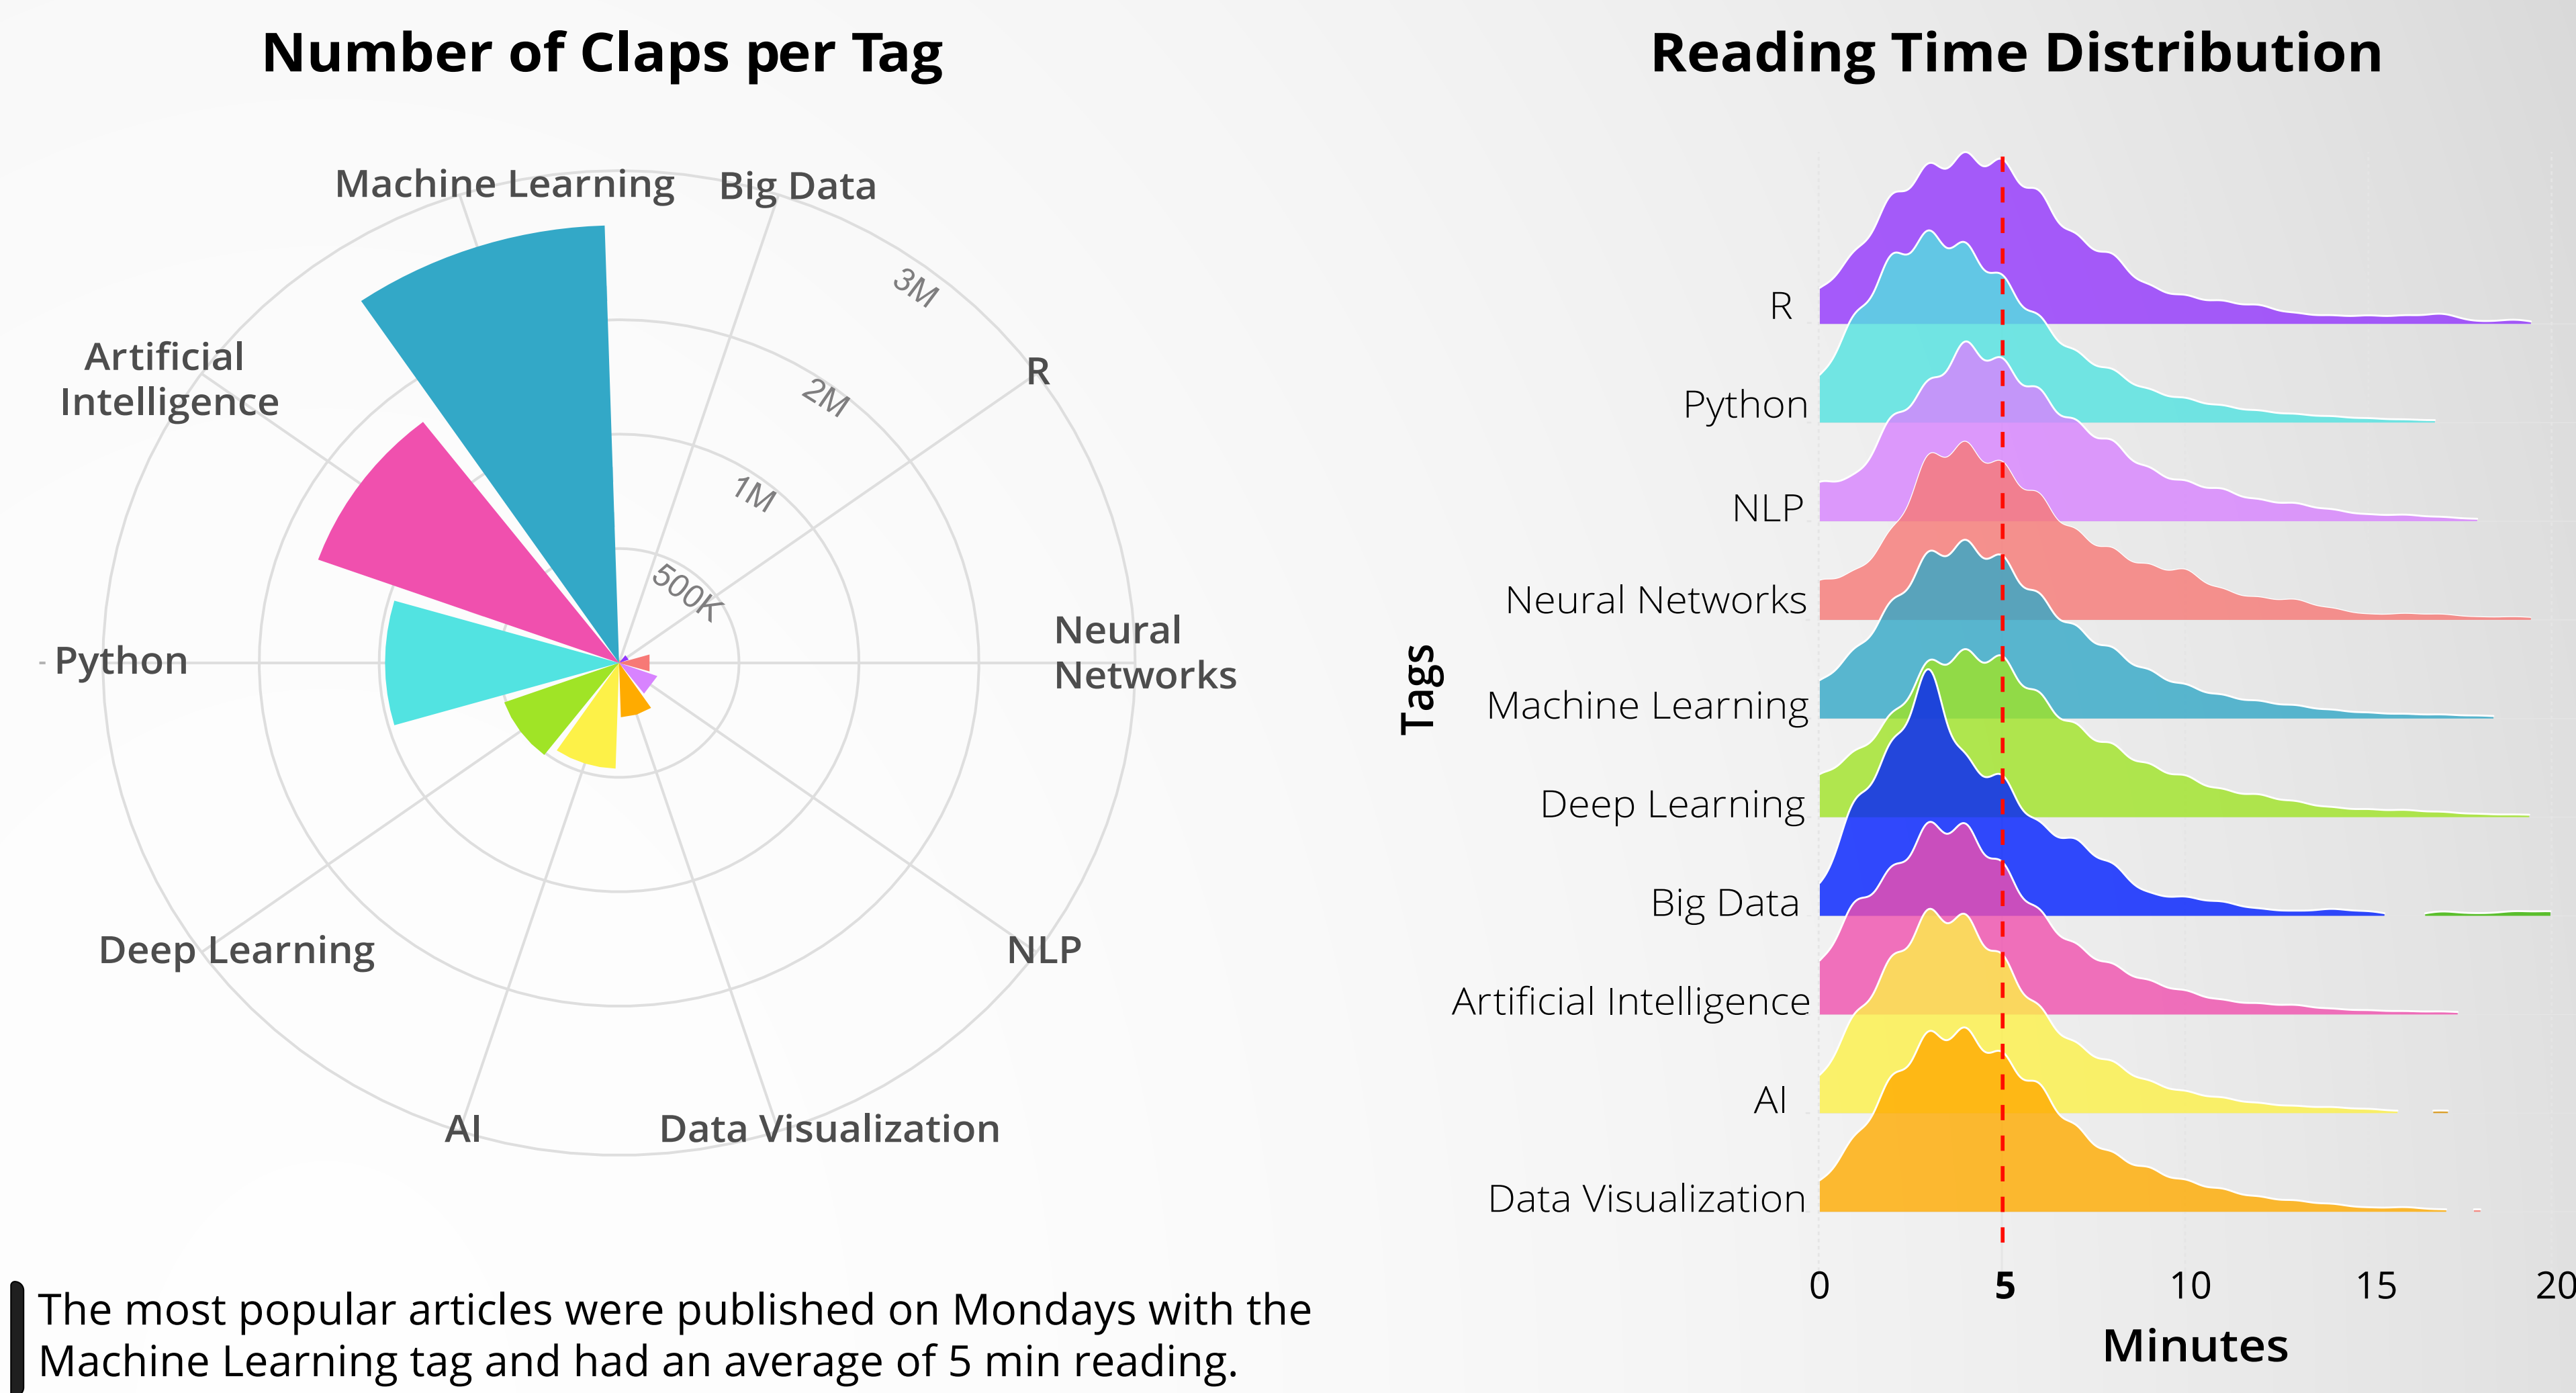

Medium is an online publishing platform where amateur, professional writers and readers share their ideas, concepts, and technical knowledge with broader audiences.

This publishing platform has a strong following in the Data Science community, making it one of the world's most popular data science blogs.

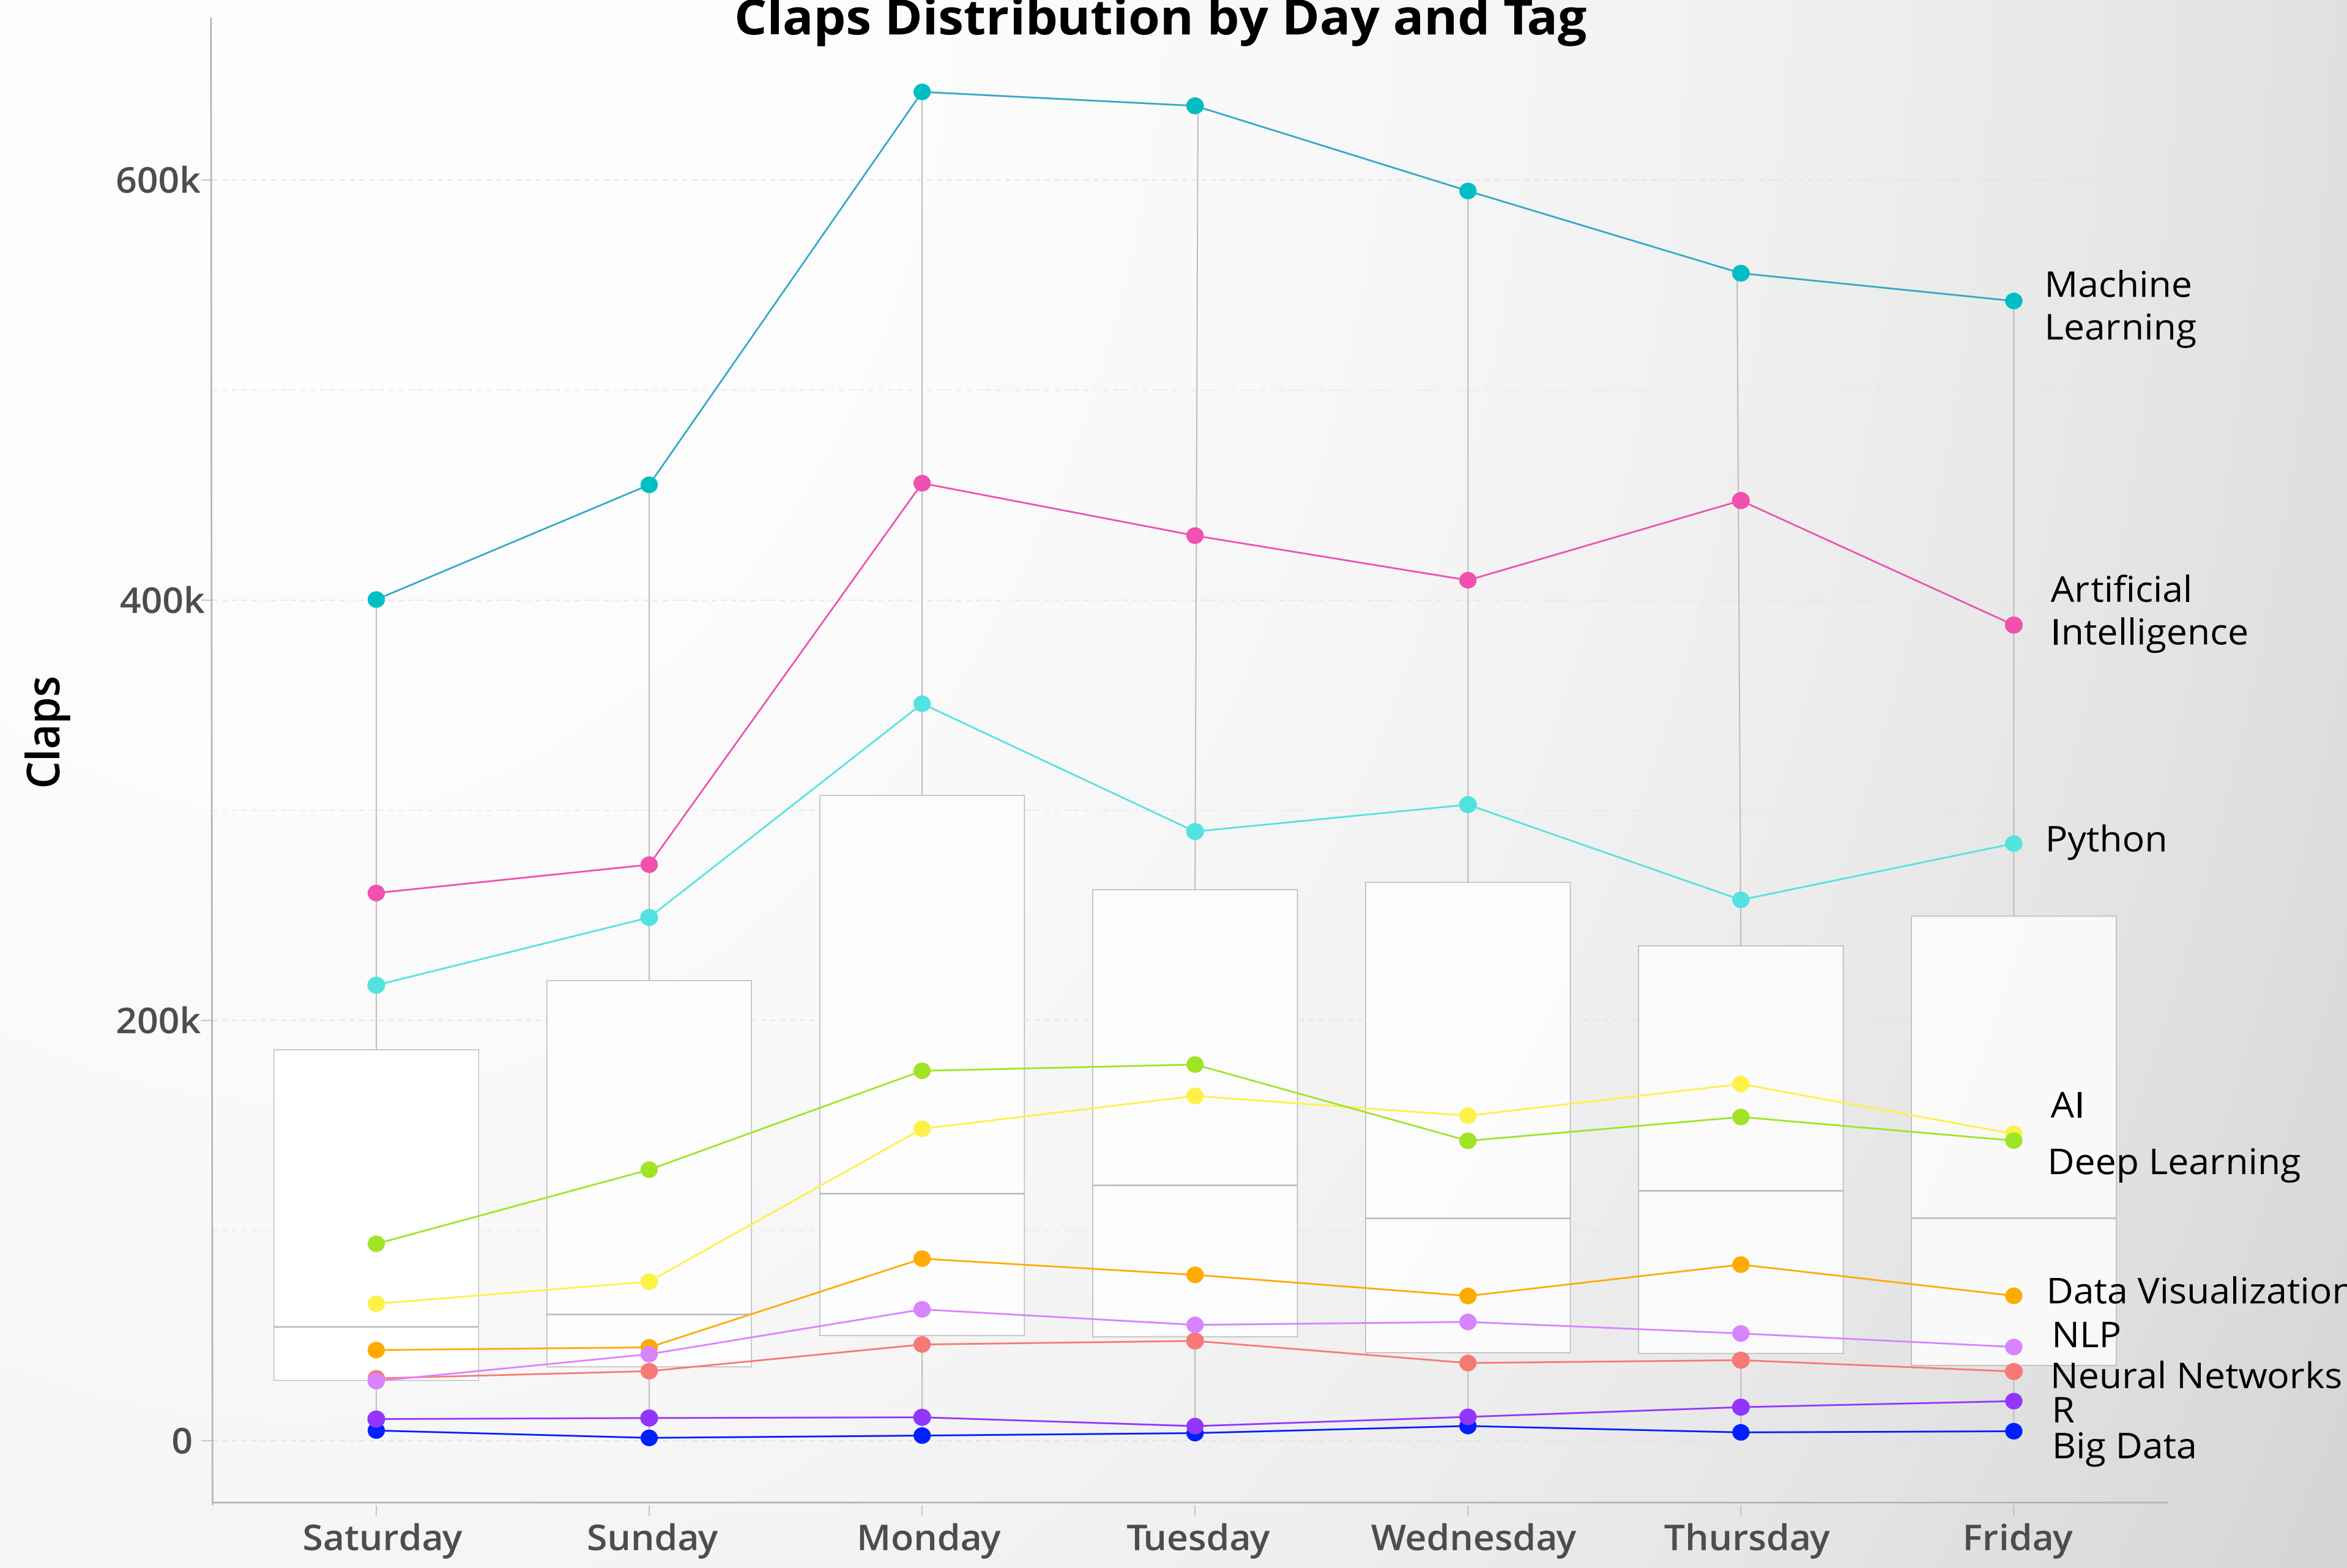

## What Data Science Tag has the Most Publications?

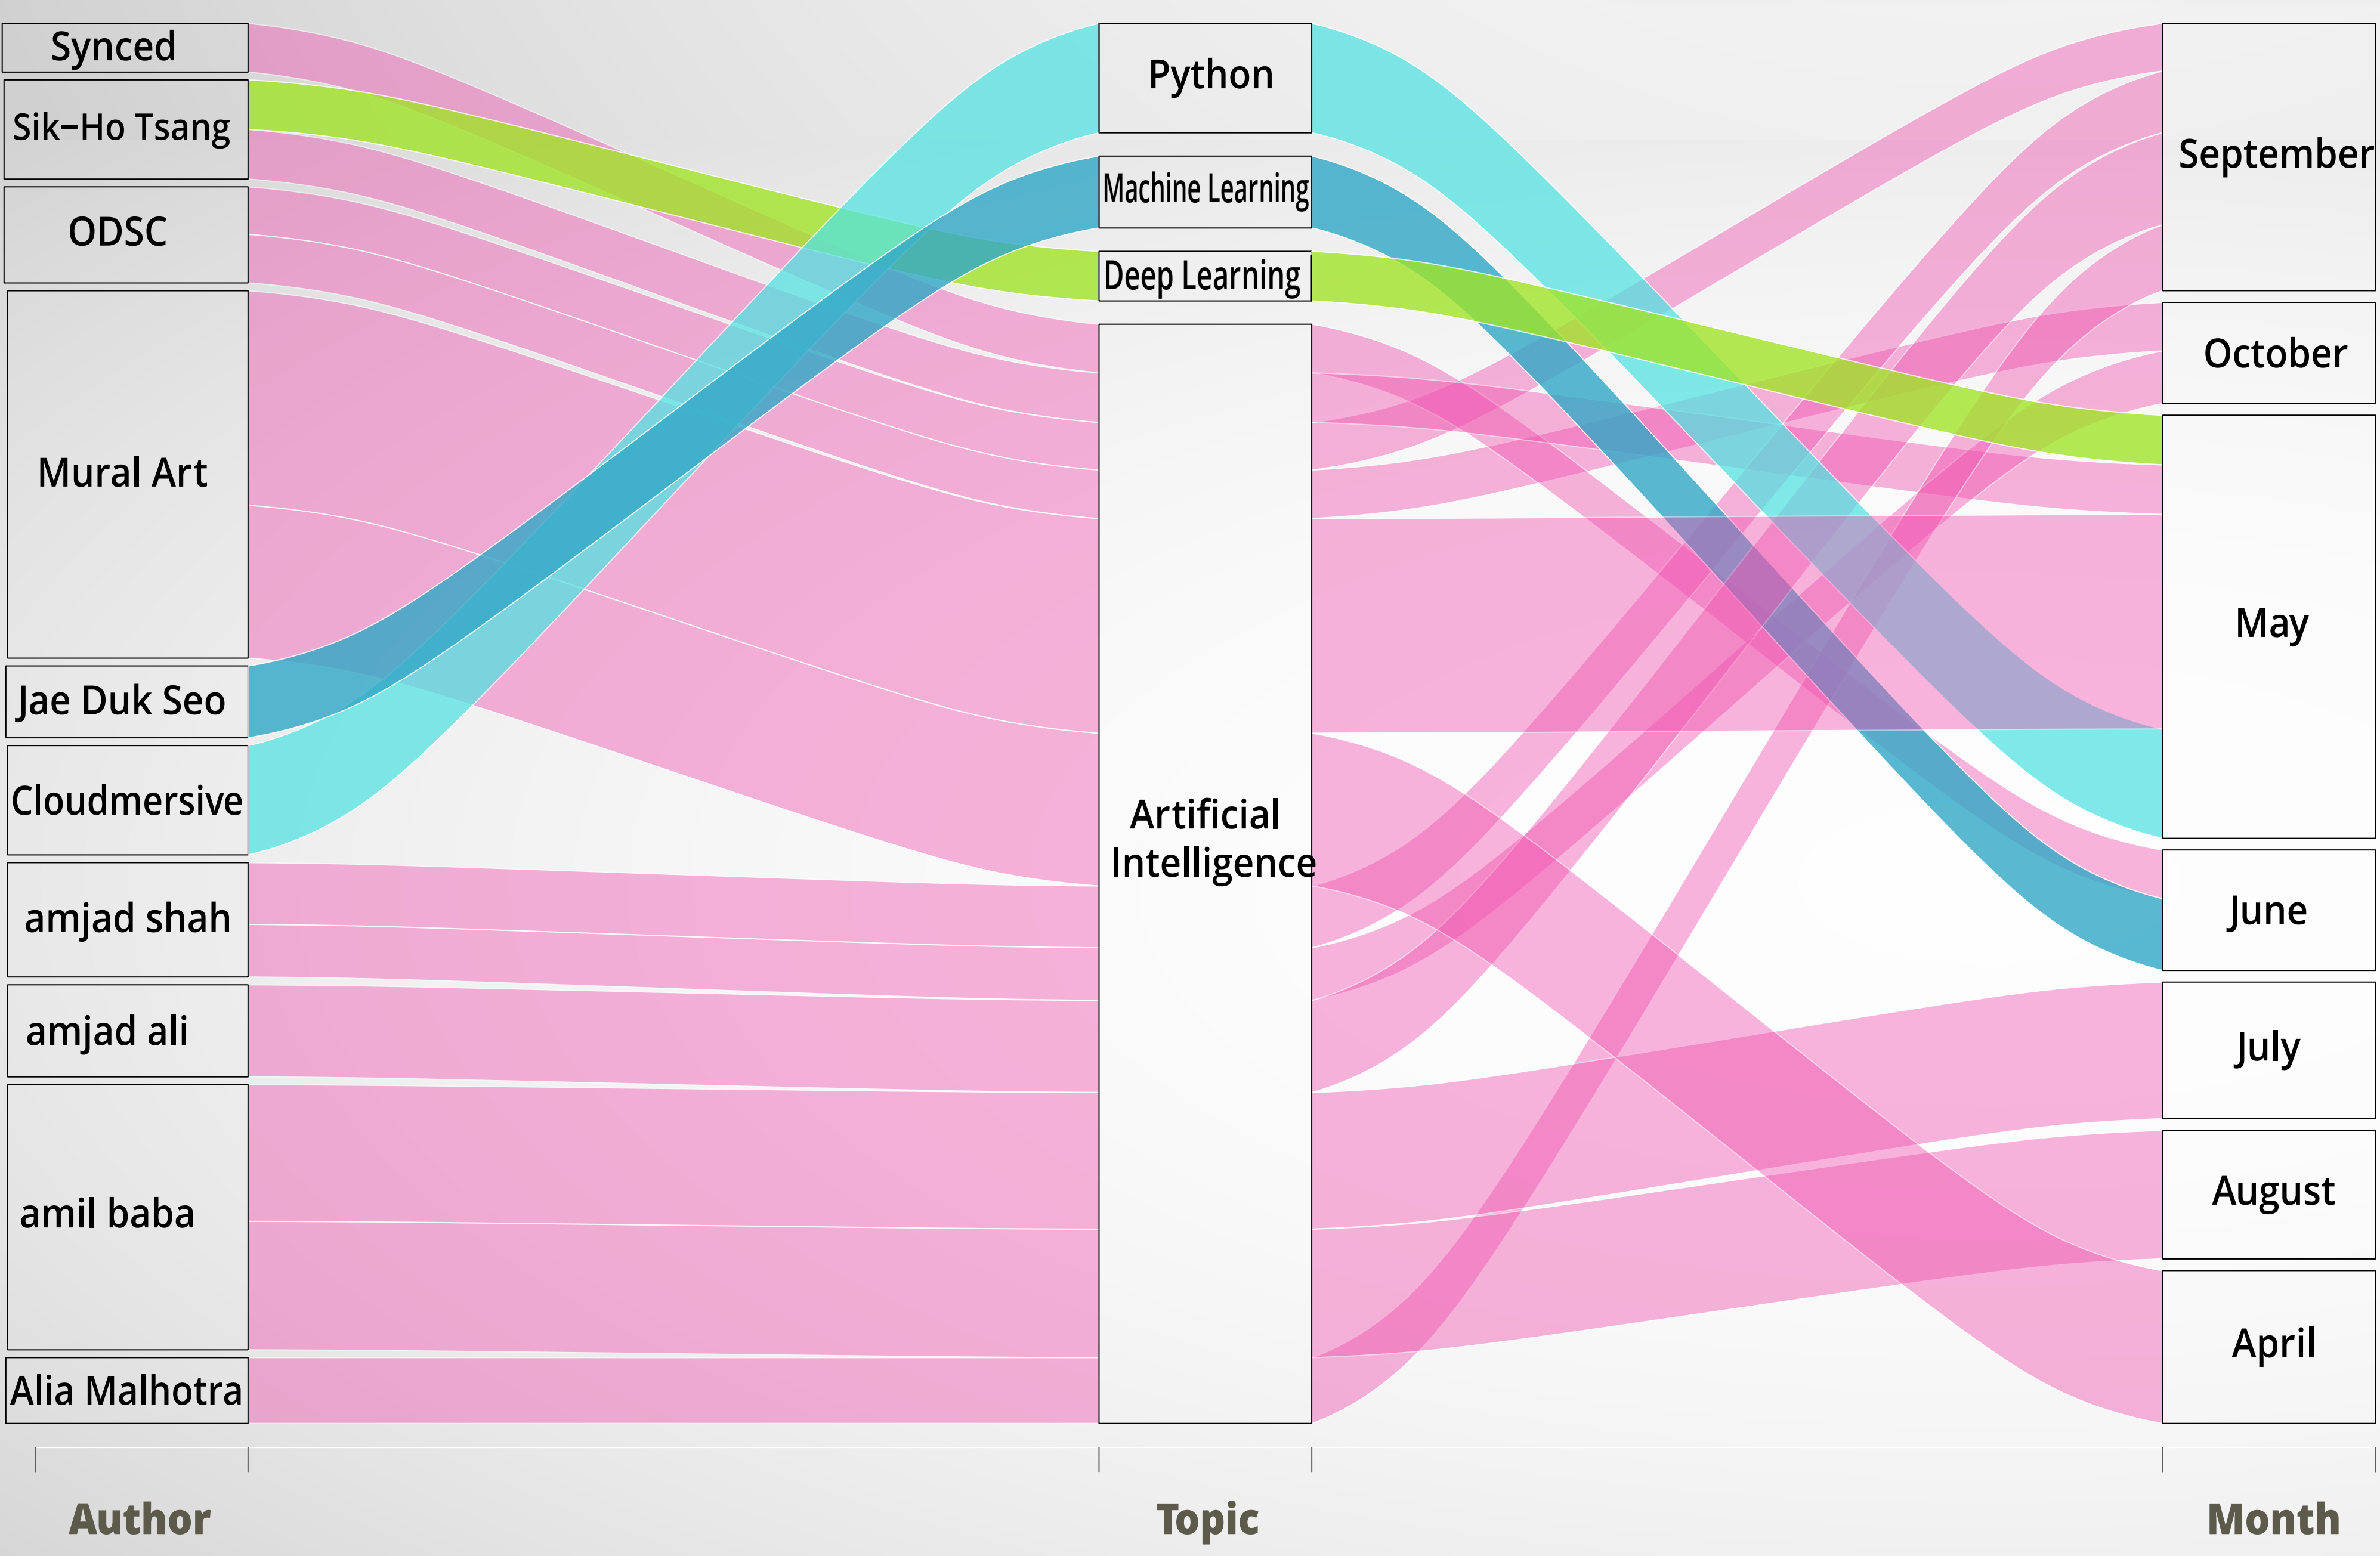

## What Makes an Article Popular?

## Claps Distribution by Day and Tag

## Who Are the Top 10 Publishers of Data Science Content?

**About the Data:**  
This data set contains information scraped from Medium.com from articles related to Data Science that were published from June 2019 to June 2020.

The data set contains 151,695 observations of 18 variables on information about articles that contain any of the most popular tags used on Medium: Python, R, Artificial Intelligence, Machine Learning, Big Data, AI, Neural Networks, Deep Learning, Data Visualization, or NLP.

The primary audience is amateur and professional writers and readers with interest in Data Science content published throughout Medium.
